

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Park on 4/2/2009.

In claim 1, last line, ",", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "logical cell".

In claim 6, line 7, ",", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "controller".

In claim 10, line 4, ",", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "controllers".

In claim 14, last line, ",", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "controller".

In claim 17, line 4, ", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "controllers".

In claim 18, line 10, ", wherein the radio network controller is configured to control a handover between logical cells based on said data indicative of the load situation of the logical cell" is added after the word "controller".

Allowable Subject Matter

2. Claims 1-5, 11, 6-9, 12, 10, and 13-20 are allowed, and are renumbered as 1-20.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ericson (U.S. Patent 6,385,449) in Figs. 2 and 3, has a process for load balancing ongoing calls between different base station controllers.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WANDA Z. RUSSELL whose telephone number is (571)270-1796. The examiner can normally be reached on Monday-Thursday 9:00-6:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema Rao can be reached on (571) 272-3174. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
